

NutriGain

The magic ingredients to making you more successful

Nutrigain provides natural solutions for making your mushroom crop healthy and increasing your PROFITS.

Nutrigain is at the leading edge in the Mushroom Industry worldwide. It has developed 3rd generation supplements which are added to the growing mushroom crop to increase yield, quality, dry matter and speed up timing.

These new generation products allow growers to 'top up' compost nutrition after heavy 1st flushes which take away more than 50% of the food source for your mushrooms.

Nutrigain provides natural solutions.

MycroNutrient

Key to increasing 2nd and 3rd flush yield by topping up nutrient during crop!

Water on 'feed' kicks in as compost nutrition starts to decline after 1st flush, keeping your yield up and your mushrooms healthy. Applications can be made during pre-crop, pinning and post 1st flush.

- Increase 2nd & 3rd flush yields**
- Higher dry matter in mushrooms (+15%)**
- Increase grade 'A' quality**
- Speeds up cycle by 1-2 days**
- No Heating**
- Mushrooms healthier**
- Less casing diseases**
- Increased shelf life**
- Applied by tree or drip**
- Organic Certified in many countries**

NaturalGold

An original different type of compost supplement free of Formaldehyde. Used in phase 2 or 3 compost at casing or spawning.

Natural Gold has a medium to high level of protein with a high oil content to ensure heavier mushrooms.

- GMO free**
- Plant base, NO animal parts**
- NO chemical preservatives**
- Natural organic acids**
- High oil content for heavy dense mushrooms**
- 40% cooler than regular protein supplements**
- Performs well on brown and white mushrooms**

SporeKill

A unique disinfectant for mushroom farms. 4 action modes: detergency, spore penetration, fungistatic and fungicidal action on spores/mycelia and physical trapping of spores in soap matrix.

- Guaranteed no residues in crops**
- Proven against *Lencancillium*, *Cladobotryum*, *Mycogone* and *Trichoderma***
- Environmentally friendly and safe to the user**
- Washing down floors, walls, shelves, nets, equipment, casing bags, crates and footdips**
- Used as post-crop sterilant**
- Complements poor 'cook out' on concrete**

"We've been using Sporekill for many years now and we believe that it's the best disinfectant available. Stuart is very helpful in all matters and always available."

Rissos Kyriakides, Kyriakides Mushrooms. Cyprus

"We are working with Stuart Whitehall since 2006 and thanks to him and his professional team, our worldwide customers are able to increase their yield in mushroom growing. In my opinion Nutrigain has the expertise and ambition to help in finding solutions in the mushroom business consistently. Because of Nutrigain wide variety in products, both granular and liquid supplements, we can always advise our customer in every situation."

Han Welten, Managing Director DTO BV. Holland

"We have been using Organic MycroNutrient for some time consistently on our white and brown rooms and we definitely see benefits in using it. Better mushrooms on last day of each flush and more consistent 2nd flushes and strong 3rd flush..."

Kieran McKenna, McKenna Mushrooms. Rathfeigh, Ireland

"We have been using MycroNutrient in all our crops for over 10 years when Stuart asked us to test it while they were establishing their patents for it. We have been very happy with the results; we feel we get better quality mushrooms and timing coming from the crop is at least 24 hours earlier. This was very apparent last year when a shipment was delayed, and we ran out for 2 weeks. We are happy to endorse MycroNutrient Liquid."

Lorenzo & Anna Maria Piccioni, Piccioni Bros. Canada

Nutrigain for your future

Nutrigain has a dedicated R&D program to find new solutions to our ever-changing growing environment. During the last 3 years, we have been working on a variety of programs including increasing yield and quality of 2nd flushes, increasing yield and quality of 3rd flushes, alternative casing materials (non peat), enhancing nutrition status of mushrooms, as well as natural solutions to controlling Dry Bubble and Cobweb diseases.

Nutrigain working with Netafim™

Nutrigain is working with Netafim™ to really move quality and yield to a new level. The key is tackling 2nd and 3rd flushes after a heavy first flush. Nutrition is one aspect and we target this with MycroNutrient. However water and casing management is an integral part of this and hence the use of drip irrigation which gives so many advantages to growers. Drip irrigation is future proofed for new 'non peat' casing alternatives as it gives a more continuous watering source during the crop cycle.

INCREASED PROFITS

- Increase yield by 2kg/m²
- Watering at any moment
- Reduce casing by 20-25% to 35mm
- Reduce energy cost - no drying needed!
- No bacterial blotch
- Dosing MycroNutrient continuously
- Ready for new peat alternatives
