

EcoFog

The Concept

EcoFog are high quality portable fogging systems designed to be moved from room to room for application of **MycroSoap** or other products in a fine fog. It totally coats all surfaces in the growing room.

We also offer complete fixed farm solutions which can be interfaced to Fancom controllers for simple easy management.

Features

- Small particle droplet size of 2 microns (real fog).
- 18L tank gives up to 2 hours of continuous fogging.
- Very directional, so no excessive moisture on growing beds
- Can also be used for fogging halls and corridors which are difficult to clean.
- EcoFog 2 model has automatic countdown timer for unattended use.

Advantages

- Particles stay in air for a long time before dropping to the floor.
- Mobile; moves easily from room to room.
- Works on compressed air so no moving parts.
- Last for years; manufactured in high quality aluminium and stainless steel.

Two models

EcoFog 1: Manual system

EcoFog 2: Automatic timer
